SOUND FAMILIAR?

- Only 10 more estimates to go…
- What's my building going to look like?
- Can I have three different quotes?
- You shorted me on my lumber package…
- Where does this material go?
- My building inspector wants drawings…
- Do you have any instructions on how to put this together?
- Oops, I cut the wrong board!
- I went with another company that got back with me sooner.

WE HAVE THE SOLUTION!

Construction Maestro®

- Customize to Your Building Style
- Multiple Siding/Roofing Options
- Open Wall & Wainscotting
- Manages Scrap Materials
- Name Brand Products Pre-loaded
- Product Setup Uses Your Products, Prices & SKU's
- Point of Sale Interface

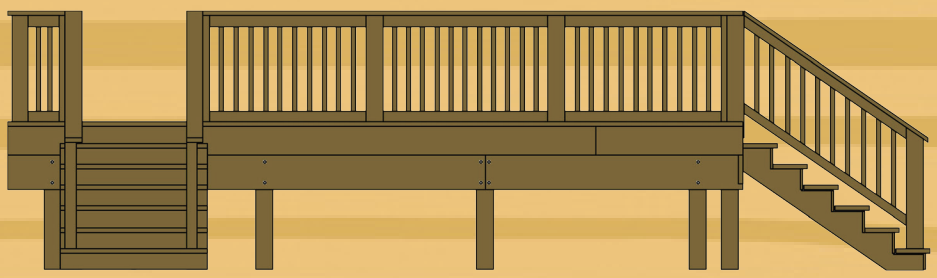
- Cover Sheet

DECK

- Post Layout
- Beam Layout
- Joist Layout
- Rail Post Layout
- Decking Layout
- Stair Details
- 2D Final Elevations
- Categorized Materials, Pull, and Cut Lists



SPECIFIC TO YOUR NEEDS!

Custom Templates

Custom Templates allow the user to pre-program specs to be used at a later time to create an estimate. The custom template still allows any changes to be made at design time, but allows for a significant reduction in estimating time since default choices are already set. Use for package sales, various sizes and builder or regional preferences.

Point of Sale Interface

Construction Maestro® has the ability to accept price updates and send materials lists to several different point of sale systems. This feature is automatically included in the system and substantially saves time and eliminates common data entry errors. Included are:

-Epicor® Eagle
-Epicor® Falcon
-Epicor® CSD
-Epicor® Enterprise
-Epicor® Dimensions
-Epicor® V2
-Epicor® BisTrack
-ECi® Advantage
-ECi® SpruceWare.NET
-Eagle Business Software
-J3 Point-of-Sale
-J.D. Associates
-CyberBOS®
-Versyss
-PacSoft
-Paradigm Accounting
-Saberis
-TransAct POS
-Cruise
-BMS

EXPERIENCE YOU CAN TRUST!

Combining the expertise of a Microsoft® Certified Professional and a building contractor with over 30 years experience in the lumber and building industry has led to the creation of the easiest, yet most sophisticated post frame, garage and deck estimating software known to the industry. Builders and lumberyards have come to depend on Construction Maestro® over the past 15 years to create hundreds of thousands of estimates in over 40 states to increase sales, save time, and provide added value to their customers.
